AMENDMENT

Technology Center 2600

Dear Sir:

In response to the non-final Office Action of October 3, 2002, please amend the above-identified application as follows:

**In the claims:**

Please amend claims 7 and 8 as follows:

7. (Twice Amended) A dual-mode communication terminal apparatus for wireless communication with a selected base station of one of at least two different communication systems, the communication terminal apparatus being logged on as ready to receive from the selected base station, the communication terminal apparatus comprising:

recognition means for recognizing one of the at least two communication systems, the recognized communication system having the selected base station; and

control means configured to allocate a network address to the recognized communication system under which the communication terminal apparatus can currently be reached and to communicate the network address via the selected base station to a control network address stored in a memory of the communication terminal apparatus;

wherein the network address communicated to the control network address stored in the memory is used for assisting in handling a call intended for the communication terminal
